GMAA assessment

The GMAA is a national association of MBA graduates. Each MBA program has been assessed for its standard and value. The assessment is based upon information derived from the Business Schools, Faculties and organisations that provide the programs and the Department of Education, Science and Training.

Any queries concerning this assessment should be directed to the GMAA Secretariat.

Some programs have not been assessed because they:

- have not been running long enough
- may be primarily offered offshore
- have insufficient students in the program
- are specialist rather than general MBAs or
- did not provide all of the required data on their program.

All programs are listed alphabetically within each group.
